

FREE WEBINAR!

GARDENING FROM THE GROUND UP

Saturday, April 10th, 2021 | 10:00 am – 11:00 am

Did you know that simply by increasing the health of your soil you can reduce pest problems? We'll discuss organic practices that work for both veggie beds and perennials gardens. This informative class will be helpful for those starting out and a handy refresher for more experienced gardeners.

In this online class, you will learn about:

how to feed beneficial soil life with compost and mulch

what types of fertilizers to use and how to apply them

irrigation best practices

putting the right plants in the right place
